Medicare: Part B Monthly Premium Changes

Starting in 2007, changes instituted by the Medicare Modernization Act required those with higher incomes to pay a greater percentage of Medicare Part B costs. Before the change, Part B beneficiaries were responsible for premiums approximately equal to 25% of the total cost of the benefit. (The federal government pays the remaining 75%.) In order to bolster Medicare's sustainability, beneficiaries with incomes over specified thresholds will pay a monthly premium equal to 35, 50, 65, or 80 percent of the total cost, depending on their income level in 2013. Note that there is a two-year look-back rule for determining income, so except in special circumstances, income from 2011 is used to determine premiums for 2013.
